

2021-2022 U Got Brains Champion Schools Program

Student Survey Report

The Brain Injury Alliance of New Jersey (BIANJ) is a recipient of a New Jersey Division of Highway Traffic Safety (NJDHTS) Comprehensive Traffic Safety Grant. In 2010, to address the issue of teen driving safety, BIANJ created the *U Got Brains Champion Schools Program*. This statewide peer-to-peer program challenges teams of students, guided by a faculty advisor, to create a teen safe driving campaign in their school and community. The Champion Schools Program has been a part of the BIANJ Comprehensive Traffic Safety Grant since 2010 and has grown steadily both in the number of participating schools as well as the number of corporate and non-profit sponsors.

In 2014, the fourth year of the program, BIANJ partnered with The Research Institute at The Children's Hospital of Philadelphia (CHOP) to create a student survey to help evaluate the effectiveness of the Champion Schools Program. BIANJ posted the student survey online and gave the link to the student faculty advisors for distribution within their school. CHOP then analyzed the results of the completed surveys and created a report of their findings.

For the 2021-2022 program, BIANJ used an amended version of the CHOP student survey to evaluate the effectiveness of this year's program from the perspective of the student team members. BIANJ staff posted the survey online, tallied the results and wrote the following summary report of their findings: **(Complete tally results are included with this summary report)*

The 2021-2022 school year was the 12th year of the *U Got Brains Champion Schools Program*. 49 high schools (public, private and technical) from 18 counties of the state participated in the program. As a prerequisite for participating, schools signed a participation agreement which stated that they would participate, to the best of their ability, in a survey of the Champion Schools Program. BIANJ Champion Schools technical support staff informed the faculty advisors of the survey at their technical support visits, in emails to the faculty advisors and during technical support conference calls. The online student survey was posted in May, and emails went out to the faculty advisors in May and June reminding them to ask their student team members to complete the survey.

Respondents from 26 schools out of the 49 participating schools completed the online survey (53%). Of the 26 schools that responded, a total of 163 students completed the survey (Atlantic Christian School-1; Bound Brook HS-3; CharterTech HS for the Performing Arts-5; Clearview Regional HS-7; Colts Neck HS-6; Columbia HS-1; Delaware Valley Regional HS-3; Immaculate Heart Academy-5; Indian Hills HS-8; Kearny HS-11; Kittatinny Regional HS-12; Lakeland HS-8; Lenape Regional HS District -9; Lindenwold HS-1; Manchester Regional Day School-12; Marine Academy of Technology and Environmental Science (MATES)-1; Marlboro HS-4; Mary Help of Christians Academy-3; Passaic Academy for Science & Engineering-4; Neptune HS-4; Nottingham HS-6; Rae Kushner Yeshiva HS-10; Robbinsville HS-9; South Brunswick HS-5; South Plainfield HS-11; Westwood Regional HS-14). **9% of the respondents were in 9th grade; 29% in tenth grade; 23% were in 11th grade and 39% were in 12th grade.** The survey consisted of 10 questions regarding the Champion Schools Program and 3 demographic questions. Below is a summary of the findings of the student surveys. For complete results, a copy of the survey along with the tallied answers from the respondents is attached.

General Conclusions from the Student Survey Evaluations:

Advantages of the Champion Schools Program

- An overwhelming majority of the students agree that **they and their friends are safer drivers (Strongly Agree=66%; Agree=23%, Somewhat Agree=6%=95% Total)** because of their U Got Brains Champion Schools Project.
- An equally large majority of the students think that **they and their friends are safer passengers (Strongly Agree=74%; Agree=15%; Somewhat Agree=6%=95% Total)** because of their U Got Brains Champion Schools Project.

- Champion Schools Program offers students the opportunity to talk about the **importance of safe driving** in their schools and promote safe driving practices. **(98% of the students agree with this statement)**
- The Champion Schools Program has a significant impact on the safe driving behavior of the students:
 - **Using the phone while driving (talk, text, search, games, music): (Never-83%)** after the program vs. **(Never-50%)** before the program. **Impact of the Champion Schools Program: 68% increase in the safe driving behavior of students who say they never use their phone while driving.**
 - **Driving focused by keeping eyes on the road at all times: (Always-70%)** after the program vs. **(Always-50%)** before the program. **Impact of the Champion Schools Program: 41% increase in the safe driving behavior of students who say they drive focused at all times.**
 - **Driving over the speed limit: (Never-63%)** after the program vs. **(Never-36%)** before the program. **Impact of the Champion Schools Program: 73% increase in the safe driving behavior of students who say they never drive over the speed limit.**
 - **Following NJ Laws for new drivers: (Always:83%)** after the program vs. **(Always-63%)** before the program. **Impact of the Champion Schools Program: 31% increase in the safe driving behavior of students who say they always follow the NJ laws for new drivers.**
 - **Wearing their seatbelts when driving: (Always-85%)** after the program vs. **(Always-77%)** before the program. **Impact of the Champion Schools Program: 10% increase in the safe driving behavior of students who say they always wear their seatbelt when driving.**
 - **Wearing their seatbelts when a passenger: (Always-80%)** after the program vs. **(Always-68%)** before the program. **Impact of the Champion Schools Program: 18% increase in the safe driving behavior of students who say they always wear their seatbelt when a passenger.**
 - **Driving with one passenger in the car (when there is no adult in the car): (Always-59%)** after the program vs. **(Always-47%)** before the program. **Impact of the Champion Schools Program: 25% increase in the safe driving behavior of students who say they always drive with only one passenger in the car.**
- The Champion Schools Program helps to bring about a change in both student and community behavior when it comes to teen driving safety.
- The Champion Schools Program is a student-centered and student-driven peer-to-peer program.
- Students are given the opportunity to speak as advocates for teen driving safety.
- Students experience a sense of pride that comes from accomplishing something important.

Overall, the U Got Brains Champion Schools Program proves to be an effective tool to engage students to help raise awareness in their schools and communities about teen driving safety and to help change both teen driver and teen passenger behaviors. Feedback from the participating faculty advisors and students will help the Brain Injury Alliance of NJ to continually improve the *U Got Brains Champion Schools Program* and allows us to offer a proven, effective statewide peer-to-peer teen driving safety program. By partnering with the NJ Division of Highway Safety and our corporate sponsors, we can continue to help keep our roadways safer for New Jersey's newest drivers and their passengers.
